It is the policy of the town to prohibit noise disturbances or unreasonably loud noise from all sources, subject to its police power, in order to secure and promote the public health, comfort, convenience, safety, welfare, and prosperity of the citizens of Cary. Nothing in this Article IV, Division 2 is intended to deter individuals from lawfully exercising the individual right of freedom of speech and commerce, or any other freedom guaranteed under the Constitutions of the United States of America or of the State of North Carolina, and nothing in this Article IV, Division 2 is intended to unreasonably limit or restrain commercial or industrial enterprise.

Subject to the provisions of sections 22-104 through 22-112, it shall be unlawful for any person to create or assist in creating any unreasonably loud, disturbing noise in the town which does frighten, annoy, disturb, injure, or endanger the comfort, repose, health, peace or safety of citizens within the Town of Cary or causes damage to property or business within the Town of Cary. Such sounds do not include the ordinary and usual sounds, noises, commotion or vibration incidental to residential living or operation of business or commercial establishments when conducted in accordance with the usual standards of practice and in a manner which will not unreasonably disturb the peace and comfort of adjacent residences or which will not detrimentally affect the operators of adjacent places of business.

(Code 1982, § 13-10; Ord. No. 93-29, 5-13-1993; Ord. No. 98-008, § 1, 6-11-1998; Ord. No. 2013-Code-05, 10-10-2013)

Disturbing noise shall mean noise which is perceived by a person of ordinary sensibilities as interrupting the normal peace and calm of an area.

Emergency work shall mean any work performed for the purpose of preventing or alleviating physical trauma or property damage threatened or caused by an existing or imminent peril.

*State law reference—Authority to regulate noise, G.S. § 160A-184.

Motor vehicle or vehicle shall mean any vehicle propelled on land by a motor, including, but not limited to, passenger cars, trucks, truck-trailers, semi-trailers, campers, go-carts, automobiles, motorcycles or buses. It shall exclude trains and emergency response vehicles such as police, fire and rescue vehicles.

Noise control officer shall mean any police officer or other person so designated by the town manager.

Occupied residential structure shall mean any structure that is occupied for residential use or that reasonably appears to be occupied for residential use; it is not necessary that a person be inside the structure at the time an unreasonably loud or disturbing noise is caused or created.

Person shall mean any individual, association, partnership or corporation, including any officer, employee, department, agency or instrumentality of the United States, the state or any political subdivision thereof.

Unreasonably loud noise shall mean noise which is substantially incompatible with the time and location where created or heard to the extent that it brings about an actual or imminent interference with peace, rest, or good order.

Technical terms:

- (1) *A-weighted sound level*: The sound pressure level in decibels as measured on a sound level meter using the A-weighting network. The level so read is designated dB(A).
- (2) *Decibel (dB)*: A unit for describing the amplitude of sound, equal to 20 times the logarithm to the base 10 of the ratio of the pressure of the sound measured to the reference pressure, which is 20 micronewtons per square meter.
- (3) *Sound*: An oscillation in pressure, particle displacement, particle velocity or other physical parameter, in a medium with internal forces that causes compression, and rarefaction of that medium. The description of sound may include any characteristic of such sound, including duration, intensity and frequency.
- (4) *Sound pressure level*: 20 times the logarithms to the base 10 of the ratio of the root mean squared (RMS) sound pressure to the reference pressure of 20 micronewtons per square meter.
- (5) *Sound-level meter*: An instrument which includes a microphone, amplifier, RSM detector, integrator or time average, output meter and weighting network used to measure sound pressure levels.
- (6) *Sound level*: The weighted sound pressure level obtained by the use of a sound level meter and frequency weighting network, such as A, B, or C as specified in American National Standards Institute Specifications for sound level meters (ANSI S1.41971 or the latest approved version thereof). If the frequency weighting employed is not indicated, the A-weighting shall apply.

- (7) *Slow response*: A measuring technique to obtain an average value when measuring a noise level that fluctuates over a range of four dB or more. By way of illustration only, a sound level meter set on "slow response" would record a sound level between two and six decibels less than the reading for a steadying signal of the same frequency and amplitude when a tone of 1,000 Hz and for a duration of 0.5 seconds is applied.
- (8) *Amplified sound*: Any sound using amplifying equipment, whose source is outside or whose source is inside and the sound propagates to the outside or to other dwellings or interior locations under separate ownership or occupancy.

(Code 1982, § 13-11; Ord. No. 93-29, 5-13-1993; Ord. No. 2013-Code-05, 10-10-2013)

Sec. 22-104. Noise measurement.

For the purpose of determining dB(A)'s as referred to in this article, sound levels shall be measured on the A-weighting scale on a sound level meter of standard design and quality having characteristics established by the American National Standards Institute (ANSI) or its successor body.

All measurements shall be taken at or within the nearest residential property line occupied by the complainant, unless otherwise stated. For multifamily structures, including apartments, condominiums, or other residential arrangements where boundary lines cannot readily be determined or do not exist, measurements shall be taken:

- (1) from any point abutting the exterior of the complainant's residential unit; or
- (2) from any point on the interior of the complainant's residential unit if taking an exterior measurement is impractical or if the noise complained of is emanating from an adjoining unit.

The sound measurement shall be averaged over a period of one minute for purposes of determining the sound level (the "measurement period"). It shall be a violation of this ordinance for the averaged sound measurement to exceed the prescribed dB(A), or for any sound or noise to exceed the prescribed dB(A) level by three or more decibels at any time during the measurement period.

(Code 1982, § 13-12; Ord. No. 93-29, 5-13-1993; Ord. No. 2013-Code-05, 10-10-2013; Ord. No. 2015-Code-004, 7-9-2015)

Third offense within one year: \$500.00

Fourth offense within one year: \$750.00

Fifth and any subsequent offense within one year: \$1,000.00

- (1) Once the one year period has run from the "first violation," the next violation shall be considered to be a first violation for the purposes of establishing a new one year period.
